

ROLLALONG PERMANENT MODULAR CONSTRUCTION

Keogh Barracks Aldershot

Following on from the successful completion of the Single Living Accommodation (SLA) blocks at Elizabeth and Alexander Barracks, Rollalong were appointed to construct this 70 bed SLA as a turnkey project. With a proven design and configuration, this project was quick to start and, with the close collaboration of PriDE and DIO, progressed efficiently and effectively through to completion within 10 months.

Key facts:

- Contract value: £3.28m
- Commenced: November 2015
- Completed: August 2016
- Duration: 10 months
- Scope: Turnkey (including all groundworks & landscaping, external cladding and roof).

Rollalong's experience of working within live MOD facilities caused little or no impact to the base or local environment.

I would like to thank (Rollalong) for providing a working environment that was clean, waste free and remarkably noise free. (Rollalong's) communication with the Regiment has been exemplary, in particular to traffic management and the minimal impact on normal daily activity.

James Foundy,
Warrant Officer 2, Regimental Quarter Master Sergeant

DIO ABP has once again been extremely pleased with the work ethics displayed by the management and project team from Rollalong. The Junior Ranks Single Living Accommodation (Jnr SLA) at Keogh Barracks had a very demanding delivery programme which caused a number of stakeholders to disbelieve that we could deliver on time and budget. The commitment provided by Rollalong meant all timelines and budgets were achieved. A very big thank you to all involved, especially the on-site project team.

Scott Ross,
DIO, Senior Requirements Manager
